

Updating the iOS Version of your iPad

The mobile operating system of the iPad is known as the iOS. To ensure the iPad is always operating at its optimum effectiveness it is important that the iOS is updated to its latest version. This is not done automatically but you can tell when an update is required. This is indicated by an alert on the *Settings* app that looks like this:

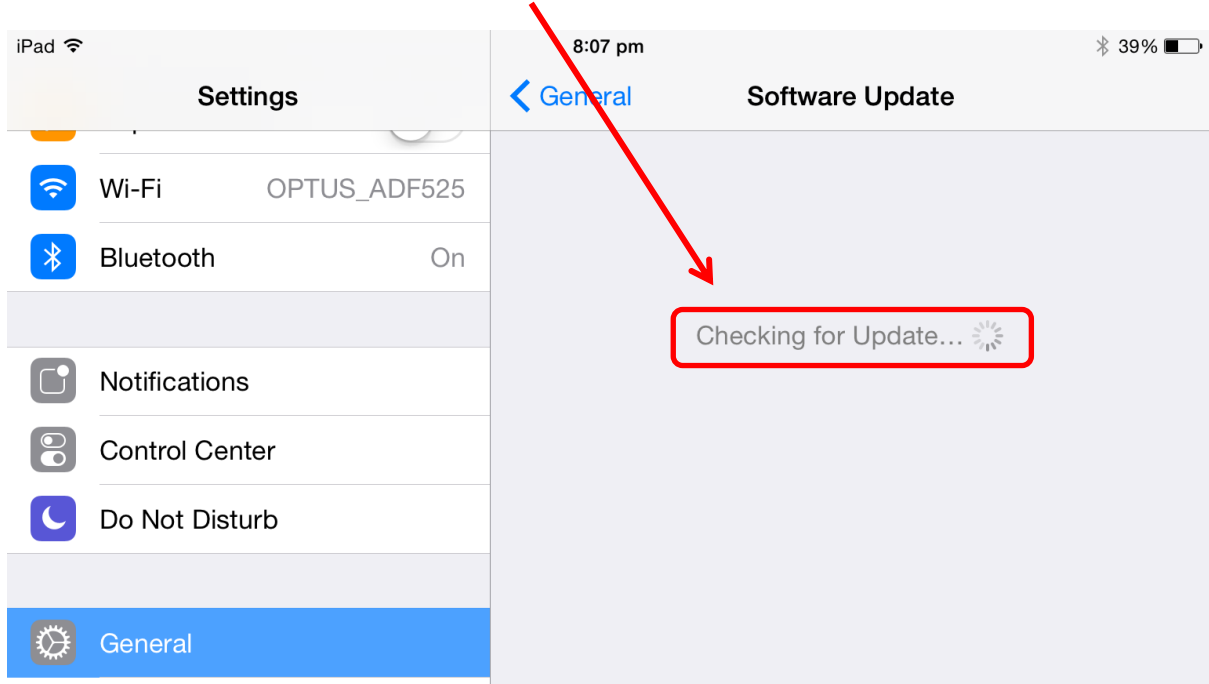

1. To update the iOS on the iPad click on the *Settings* app.

2. Then Click on *General*.

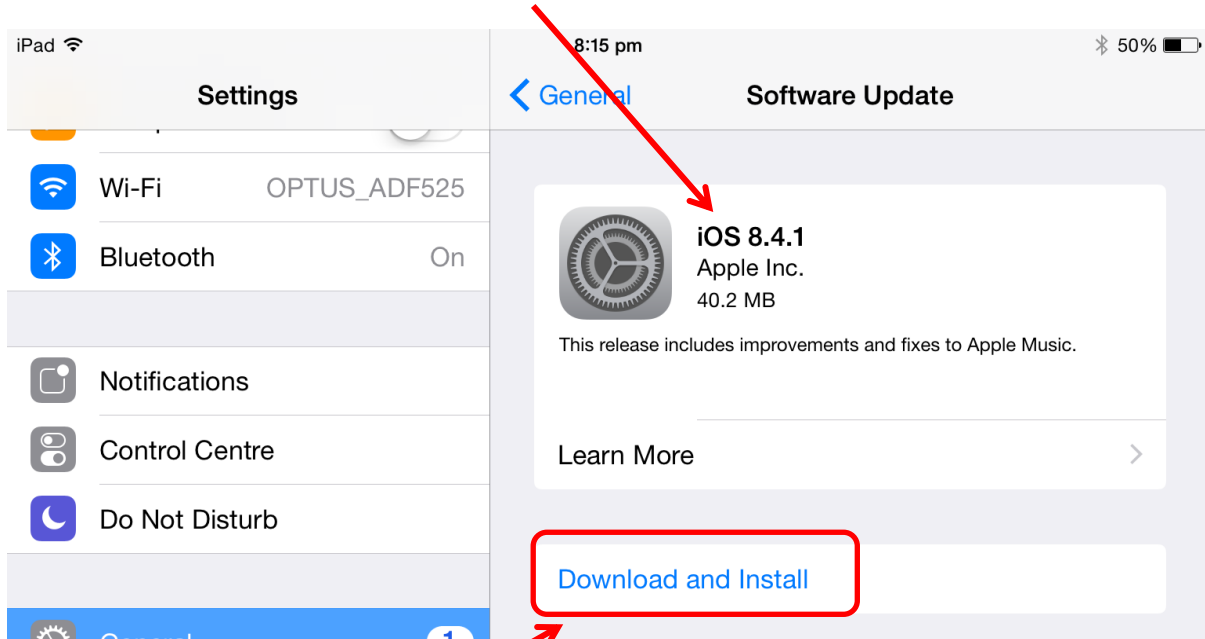

3. Then click on *Software Update*.

4. The iPad will then check for any updates.

5. It will indicate the iOS Update required.

6. Just click on the *Download and Install* button.

7. After the iOS update is installed it will indicate your iPad is now updated to the latest iOS version.
